-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Group I in the reply filed on January 26, 2006 is acknowledged. The election being proper is made final. Claims 2 9 and 28 are withdrawn.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3-8, 10-12, 16, 21, 25, 26, and 27 rejected under 35 U.S.C. 102(b) as being anticipated by Barnes et al. (US/6,062,186).

4. Barnes discloses a method and apparatus for starting an internal combustion engine having electrically actuated valves the method/apparatus comprising: closing at least an intake valve of at least a cylinder in said engine in response to a request to start said engine; opening at least an exhaust valve of said at least a cylinder in said engine in response to said request; closing said at least an exhaust valve in said at least a cylinder before a start air induction event in said at least a cylinder; injecting fuel to said at least a cylinder opening said at least an intake valve in said at least a cylinder inducing an air amount; combusting said injected fuel in said at least a cylinder; and opening said at least an exhaust valve in said at least a cylinder after said combustion in said at least a cylinder. See abstract and claims 3 and 9.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13-15 and 29-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barnes et al. (US/6,062,186).

7. Barnes applies as in claims 1 and 8 above, the choice of particular air fuel mixture or pattern of operating valves are merely design choices Obvious to ones skilled in the art. There are no unexpected results from these choices as evident because they are exclusive of all available choices.
